

AUG type Accumulator with non exchangeable bladder

Technical data

Operating pressure:
AUG 0.35 max 210 bar

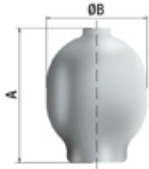

Gas filling (nitrogen only): max. 90% of min. operating pressure
Admissible pressure ratio: max. $\leq 20/1$
Operating temperature: -40 +150°C (Compatible with the temperatures admitted for the diaphragms)
Mounting: any position

Standard construction characteristics

Material of body:
AUG 0.35 carbon steel

Bladder: NBR
Gas connection valve: 5/8"UNF version 1
Painting: anti-rust primer
Test: on request

AUG 0.35
